EDUCATION

Chuo University Suginami High School | Tokyo, Japan | Apr 2021 - Mar 2024

General Course

- **Academic Average:** 72.75/100 (approximately 4.42/5.0), ranked 12th out of 320 students; final recorded grade: second semester of senior year.

Chuo University, Faculty of Law, Department of Law | Tokyo, Japan | Apr 2024 - Expected Mar 2028

Bachelor of Laws (LL.B.)

- **GPA:** 3.48/4.0 (3.61/4.0 in the most recent academic year).
- **Relevant Skills:** Logical reasoning, statutory analysis, and complex problem-solving.

The University of Tokyo, Matsuo-Iwasawa Laboratory | Remote | Completed Mar 2026

GCI (Global Consumer Intelligence) Data Science Program

- Completed an intensive data science and machine learning curriculum using Python.
- Developed predictive modeling and data analysis skills using NumPy, Pandas, and Scikit-learn.

Harvard University (via edX) | Remote | Completed Jan 2026

CS50x: Introduction to Computer Science

- Demonstrated foundational knowledge of data structures, algorithms, and memory management.
- Completed complex problem sets using C, Python, SQL, and JavaScript.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, Dart, JavaScript, Go, Ruby, VB.NET, SQL (PostgreSQL), HTML/CSS.
- **Frameworks & Technologies:** Django, FastAPI, Spring Boot, Flutter, Firebase, Astro, Tailwind CSS, Node.js.
- **Tools & Platforms:** Git, GitHub, GitLab, Linux (WSL), Docker, Google Cloud/Firebase, Cloudflare.
- **AI Tools:** ChatGPT, Codex, Claude, Claude Code, Gemini, Antigravity, GitHub Copilot.

Primary AI-tool use: technical research; market research and analysis; drafting specifications and other documentation; implementation and debugging; test creation; and test execution, including E2E testing.

PROFESSIONAL EXPERIENCE

Software Engineer (Part-time) | Wakyu Co., Ltd. | May 2024 - Present

- **ERP System Replacement:** Leading the modernization of a legacy ERP system for a printing company using Python, Django, and PostgreSQL.
- **Medical Asset Management:** Developing features for a healthcare asset-tracking platform using Java, Spring Boot, and PostgreSQL.
- **Protocol Management System:** Developed a procedure-management system for a local-government-related project using JavaScript, improving transparency in a previously opaque process.

Software Engineer (Intern) | Howtelevision, Inc. | Mar 2026

- **High-Performance API Development:** Designed and implemented RESTful APIs using FastAPI, leveraging asynchronous programming to handle concurrent user requests efficiently.
- **Data Validation & Security:** Used Python type hints and Pydantic within FastAPI to ensure robust data validation and reduce runtime errors in production.

Software Engineer (Intern) | GA technologies Inc. | Apr 2026

- **Modeling Real-World Scenarios in Code:** Translated realistic real-world events and business situations into Ruby implementations.
- **Code Quality Improvement:** Examined what makes code "good" beyond simply working, defining code quality in terms of the value the software can create.

Software Engineer (Intern) | Minna Bank, Ltd. | Jun 2026

- **Core Banking System Development:** Implemented key components of an online banking system as part of a team using Java and Spring Boot.
- **Team Leadership:** Proactively coordinated the team and received feedback that I was effectively leading it from an objective perspective.

Software Engineer (Intern) | DMM.com LLC | Aug 2026

- **Go & Onion Architecture:** Developed part of a social networking system using Go and Onion Architecture.

Software Engineer (Intern) | Loglass Inc. | Aug 2026

- **Management Accounting System Development:** Implemented automated journal-entry import and automatic generation of P&L and balance-sheet statements.
- **Business-Workflow-Oriented Development:** Developed application features based on real operational workflows.

Software Engineer (Intern) | M3, Inc. | Aug 2026

- **New Feature Development:** Proposed and developed a new feature designed to increase the value of an existing application.
- **ROI-Driven Development:** Focused on business ROI rather than technical implementation alone, and implemented the feature with an evidence-based rationale.

Software Engineer (Intern) | GMO Internet, Inc. | Aug 2026

- **Registrar Application Development:** Acquired practical knowledge of domain registration and translated it into an application designed from a registrar perspective.
- **API / Database Optimization:** Reduced database read operations by more than 90% through implementation-level optimization.
- **In-Browser AI Integration:** Embedded an in-browser inference model to reduce costs, enabling AI functionality while keeping inference cost at zero.

PROJECTS & LEADERSHIP

Founder & Lead Developer | Choco Next Year For Sure (Sole Proprietorship) | May 2025 - Present

- Founded a sole proprietorship and led a cross-functional developer team to deliver full-stack solutions.
- Architected and deployed cross-platform mobile applications using Flutter and Firebase, managing the full product lifecycle from requirements definition to production release.
- Developed high-performance web platforms using Astro and Tailwind CSS, optimizing Core Web Vitals and SEO.

AWARDS & CERTIFICATIONS

- CS50 Certificate | Harvard University / edX | Jan 2026
- GCI Completion Certificate | The University of Tokyo, Matsuo-Iwasawa Laboratory | Mar 2026
